

ROTARY WING SPECIALISTS

Omni is an Australian-owned business focused on delivering innovative defence, national security, intelligence and critical infrastructure solutions to further our national interest.

Our locally based, expert teams deliver cutting-edge technology and pioneering solutions in support of Australia's sovereign capability.

Omni is a leading aircraft maintenance and refurbishment company operating out of secure, purpose-built facilities on the East and West coasts of Australia. With decades of experience in the aviation industry, Omni is a trusted, proven partner delivering high-quality, reliable support for your aircraft.

Our East Coast facility in Queensland is home to our Rotary Wing MRO department. Our services include scheduled and unscheduled maintenance, major inspections, engine maintenance, avionics upgrades, AOG response and remote field support.

With approved, certified aircraft painters and engineers, Omni delivers everything from touch-ups and corrosion repairs to specialist coatings, full strip-back and repaint, interior refurbishment and reupholstery-combining rotary-wing maintenance, overhaul, paint and avionics under one roof.

We offer services on a range of rotary-wing aircraft and engines including:

- **Aircraft:** Airbus, Bell, Leonardo, Robinson
- **Engines:** Rolls-Royce, Honeywell, Safran, Pratt & Whitney
