Omni Case Study
Speed to Capability through Partnership – Global Innovation, Australian Assurance

Executive Summary

Omni Executive partnered with Saronic Technologies to establish its Australian presence and support the rapid assembly, integration, and delivery of advanced autonomous maritime capabilities. The partnership combines proven allied technology and investmentwith Australian expertise and assurance, supporting Saronic's contribution to Australia's sovereign defence industrial capability.

The Challenge

In an era of escalating geopolitical competition and digital vulnerability, assurance is the invisible force keeping Australia secure and operationally prepared. For Defence and Defence Industry Security Program (DISP) members, it protects classified information, supports sovereign readiness, and maintains secure access to Defence programs.

In line with the Australian Government's Sovereign Defence Industry Priorities and AUKUS Pillar 2 objectives, Saronic set out to establish its Australian presence quickly, and to do so within an operating environment capable of supporting the secure, compliant and sustainable growth of its autonomous surface vessel capabilities.

The Solution

To help Saronic address its Australian regulatory and operational requirements efficiently, the company turned to Omni. Omni developed a targeted assurance approach, focusing investment where it was needed and avoiding unnecessary cost and complexity.

- Regulatory Advice and Guidance: Omni analysed Saronic's Australian operations and growth objectives, providing tailored regulatory advice and compliance support
- Defence Industry Security Program (DISP): Omni assisted Saronic's understanding of the DISP framework, its role within Australia's national security settings, and provided assistance to achieve thorough compliance.
- Personnel: Omni provided personnel security assurance, clearance and reporting obligations.
- Safety: Omni partnered with Saronic's to develop safety frameworks aligned to Australian legislation and regulatory requirements, including Work Health and Safety (WHS) and Hazardous Materials (HAZMAT) management.

Omni Case Study
Speed to Capability through Partnership

Key Takeaway

The partnership demonstrates how proven allied technology can be established and scaled in Australia quickly, responsibly and costeffectively, supported by Australian security, regulatory and assurance expertise.

Omni's support has provided Saronic with a strong foundation to grow its Australian operations and contribute to Australia's sovereign defence industrial and maritime capability.

About the Partners

Omni Executive

Founded in 2012 in the nation's capital, Canberra, Omni is an Australian-owned delivery partner bringing together veteran expertise and industry experience to provide national security and critical infrastructure solutions to Defence, industry, and government.

Across Aerospace, Professional Services, Assurance, Secure Infrastructure, and Training, our teams strengthen sovereign capability, safeguard essential systems, and support secure, resilient operations in complex and highconsequence environments.

Saronic Technologies

Founded in 2022 and headquartered in Austin, Texas, Saronic designs, manufactures and operates autonomous surface vessels, integrating vessel design, manufacturing and autonomy software to deliver advanced maritime capability at speed and scale.

Saronic is expanding its presence in Australia and working with government and industry partners to foster local capability and support the longterm growth of maritime autonomy in country.
